# Marble Tablet in Main Hall of Hospital

## THE CHARITY HOSPITAL

OF LOUISIANA

WAS FOUNDED IN THE YEAR 1786

BY

DON ANDRES ALMONASTER Y ROJAS,

To whose generous endowment, the munificence of the

LEGISLATURE OF THIS STATE,

and the liberality of the State of Pennsylvania, the community is indebted  
for the means of erecting this edifice, built in the year

1832.

His Excellency A. B. Roman, being Governor and Ex-Officio  
President of the Institution.

To record which and inscribe hereon the names and contributions of its distinguished benefactors

# Annual Report of the Vice-President

## J. P. HENICAN

---

NEW ORLEANS, February 24th, 1919

His Excellency, Ruffin G. Pleasant, Governor of the State of Louisiana, and Ex-Officio President of the Board of Administrators of the Charity Hospital of Louisiana, Baton Rouge, La.

Your Excellency:—I have the honor of presenting to you my annual report as follows:

Notwithstanding the stress of war conditions under which our institution has labored during the past year it emerges from a trying situation unimpaired in efficiency, a condition which justifies the hope that the realization of world-wide peace will witness a culmination of the abnormal demands upon its resources and personnel.

Wholehearted co-operation with our Government is evidenced by the eager response to the call to arms upon the part of doctors, nurses, and others to the number of two hundred and sixty-two, among them being many whose services were conspicuous in the professional and scientific work of some of the more important departments. Those who were called upon to continue their work, however, also responded with noble generosity and self-sacrifice in their efforts to maintain a standard of service which fundamentally leads to the solicitous care and comfort of the unfortunate afflicted who have sought the ministration of the institution.

By endeavoring to foreshadow rapidly changing values in many of the essential commodities and by anticipating our needs through the effecting of time contracts where feasible, it has been possible to record the phenomenally low cost per patient per day of \$1.12, and this in the face of serious appreciation of indispensable drugs, instruments, general supplies, etc., to say nothing of numerous other items of less importance, affecting our operating cost.

Coincidentally, extensive and highly beneficial improvements have been accomplished, notably, the installation of a modern system of heat distribution, resulting primarily in a substantial saving of fuel, but more particularly in dependable radiation throughout the various buildings. The erection of an ice plant, and model bakery, proving of financial benefit, while insuring a regular and abundant supply of ice and bread. Renovating and modernizing of the plumbing in several of the main buildings—in fact these additions and betterments are so thoroughly demonstrating their value and desirability, it is a source of wonderment that the institution has progressed without them during many years past. On this point there remains much more to be desired. Unquestionably the need of fire protection is most urgent, and this can only be satisfactorily realized through the installation of a standard sprinkler system. Ample facilities for the storage of supplies are sadly lacking, and more commodious quarters for this purpose are much to be desired. A larger and thoroughly modern mortuary is of prime necessity, a fact which be-

came too flagrantly apparent during the recent epidemic of influenza when in order to administer to every one who sought admittance regardless of the stage of the disease evidenced by the applicant, a difficult problem arose in caring for the bodies of those unfortunates who succumbed to the infection, during the period of greatest mortality. Even more important than the latter, however, is the present need of an electric power plant for lighting purposes, as the existing public service not only substantially adds to overhead costs, but from time to time suffers vexatious and demoralizing interruptions.

While we are not unmindful, therefore, of the prompt and generous response of the State to our previous appeal, through this medium, for an increase in appropriation, it can readily be seen that our available funds will not permit of the consummation of our effort and desire to undertake, except in part, even these major additions when we point out the fact the year closes with further encroachments upon the Special Fund Account (set aside for permanent improvements) through the necessities of current expenditures to the extent of \$26,000. It is gratifying to be in a position to chronicle in this connection, however, that the replacement of withdrawals from the Special Fund Account is made possible in the near future through the beneficence of the State in reimbursing expenditures from this source, in liquidation of General Fund Account liabilities, and it is entirely within the range of possibilities that during the process of readjustment to a peace basis, many of the suggested improvements can be undertaken and successfully concluded.

The grim hand of death has again invaded our Board Membership, removing from our midst Mr. Nathan S. Stern, and depriving us of the assistance of his wise counsel and advice, as well as of a staunch friend and benefactor. His passing is deeply regretted.

We again acknowledge with much gratitude numerous donations and legacies which have permitted additions to our equipment, and for which funds would otherwise have been lacking, and especially do we consider it not only our duty, but a privilege of which we gladly avail ourselves, to express to Sister Stanislaus and her worthy companions, upon behalf of myself and associates, the very deep appreciation we have of their personal donation of various interior furnishings and appurtenances purchased with funds raised through their own initiativeness.

The exigencies of war instigated the resignations of our former house surgeons, Doctors Kostmayer and Gelpi, while other depletions in our force inflicted a burdensome task upon our worthy Superintendent, Doctor Stephen W. Stafford, who has merited our unstinted approbation of his heroic efforts under unusually trying conditions, chiefly incident to the epidemic of influenza, in which he was ably assisted by House Surgeons, Landry and Leidenheimer, both of whom made many personal sacrifices in their efforts to administer to the large influx of patients so afflicted.

Our thanks are also due to our worthy Secretary-Treasurer, Mr. Fred. W. Matthews, who at all times displays a keen interest in the affairs of the institution, and to many others who have contributed to its successful conduct.

I am personally obligated to the members of the Board for their uniformly hearty support, and assure them it is valued immeasurably.

Yours respectfully,

J. P. HENICAN,  
Vice-President.

STATE OF LOUISIANA }  
EXECUTIVE DEPARTMENT }

BATON ROUGE, LA., February 25th, 1919.

Hon. J. P. Henican, Vice-President, Board of Administrators, Charity Hospital of Louisiana, New Orleans, La.

Dear Mr. Henican:—The purpose of this letter is to acknowledge receipt of your splendid annual report. I have read it with a great deal of interest, and am filing it in the records of this office. I wish to congratulate you, the Board, and the other officers of the institution for the intelligent and successful manner in which the affairs of the hospital have been handled.

Very sincerely yours,

R. G. PLEASANT,  
Governor.

# Report of the Medical Committee

NEW ORLEANS, La., February 24th, 1919.

To the Vice-President and Board of Administrators of the Charity Hospital, New Orleans.

Gentlemen:—Nineteen months of war have brought to a successful conclusion one of the greatest conflicts in which this country has ever engaged. No industry, no institution of this country was spared of its direful influence; our great institution—The Charity Hospital—has been no exception; and similar to the ship well-manned it has stood the violence of the storm valiantly and stands today moored at the banks of safety, a living monument of the devotion, efficiency and ability of its staff of officers.

In reviewing the operations of the Medical Department of the Hospital, we cannot refrain from stating that much good has been achieved and progress made in every line of endeavors in which it has been engaged; notwithstanding the ever-increasing cost of labor and material, and no corresponding increase in revenues.

During the strenuous period of the war our work has been at all times of constructive progress; notwithstanding the concomitant difficulties which opposed our endeavors.

By the wise foresight of our active, cautious and progressive Superintendent, Dr. S. W. Stafford, chemicals, surgical instruments, surgical materials, etc., were judiciously purchased, necessary for the Medical Department; and, at no time, was the hospital ever embarrassed in supplying to its ever constant increasing needs.

During the past year, several changes took place in the personnel of the Visiting Staff, made by the necessary absence of those who entered the government service. This condition claimed all the available time of those who did not enter the military service, and the patients suffered no impairment and practically no curtailment of necessary attention.

While we congratulate those who entered the service for their patriotism, we, sincerely, thank those who remained with us for their unselfish devotion during this most trying period.

We especially call attention to the faithfulness, co-operation and support of all the members of the House Staff during those most gloomy days of our history. We wish also to particularly call attention to the great devotion shown by the House Staff during the Influenza epidemic. It was found necessary to double the work of the devoted staff, involving great personal sacrifice on their part, which happily gave unmeasured, beneficent results to the afflicted.

We desire to extend to Dr. Stafford and his staff of officers, together with the Interne Doctors and Visiting Physicians, our sincere appreciation for their unflinching devotion and co-operation during the Influenza epidemic. To Sister Stanislaus and all the Sisters, together with the Nurses, we generously recognize their unstinted, zealous devotion, and desire to express to them, also, our most sincere appreciation.

Finally, we desire to thank our efficient and genial Secretary, Mr. Fred. W. Matthews, for the many graceful courtesies received from him at our numerous committee meetings.

In our serenity, we look now, to still further greater achievements in the future, and with the same unselfish co-operation of all, so vividly and jealously shown in the past, we can confidently anticipate to add to the history of the Hospital, another brilliant page of progressive achievements of its Medical Department.

Yours respectfully,

ALBERT J. LAPLACE, Chairman,  
J. P. HENICAN,  
M. J. HARTSON.

## Report of the House Committee

NEW ORLEANS, February 24th, 1919.

To the Vice-President and Board of Administrators of the Charity Hospital, New Orleans, La.

Gentlemen:—During the year 1918 many needed improvements were accomplished despite unusual conditions. The high cost of some commodities justified the effort on our part to prepare for the future, especially in making our own bread and ice. At this writing both the Bakery and the Ice Plant are proving their value particularly in the quality of bread and quantity of ice available at all times, with a marked decrease in the cost of both.

The reconstruction of the Heating System throughout the various buildings, with improved service from the power house, together with the installation of instruments in our boiler room, tends to economize in the use of fuel and to promote efficiency in heating the wards and buildings.

This much has been accomplished during the past year and it now becomes necessary for us to undertake some means of providing a better system of lighting the buildings, particularly in the wards of the main building. We suggest the employment of an expert Electrical Engineer to report in full the advisability of installing our own electric light plant, also rewiring where necessary.

We are obliged to call your attention to the urgent need of new motor ambulances. The three now in use are very much run down and worn; all are in constant need of repair, involving a heavy expense to maintain them.

We are pleased to advise that during the year we have had an ample supply of Gauze, Bandage Cloth, Sheeting and Coal, and many other items, though hard to obtain, were procured at the proper time in sufficient quantity to carry us well into the ensuing year; therefore, we may make some improvements so long desired but deferred from time to time due to lack of funds. Where it was necessary to purchase in large quantities, we were greatly hampered by lack of storage facilities. Considering the expenditure of \$103,000.00 in food products and \$77,000.00 in medicinal and surgical supplies, apparatus and instruments, housekeeping and laundry supplies, during the year, a storage house is not only prerequisite but good business judgment demands it and prompt action should be taken to meet this requirement. A capable and responsible storekeeper should be employed to keep record of all supplies, the receipt and disposition of them.

Yours respectfully,

GEO. J. GLOVER, Chairman

C. A. TESSIER,

TERENCE SMITH.

## Report of the Finance Committee

NEW ORLEANS, February 24th, 1919.

To the Vice-President and Board of Administrators, Charity Hospital, New Orleans.

Gentlemen:—At the last session of the General Assembly, the report and recommendation of the Board of State Affairs was adopted and appropriation made in accordance thereto. An increase over the old appropriation was manifest, though it is apparent that the amount appropriated is insufficient. However, European hostilities having ceased, there is every reason to look forward to a considerable reduction in the cost of many hospital necessities, and together with reasonable economy we may hope to maintain the institution, though it is unreasonable to expect to keep pace with the advancement of new ideas and scientific methods which a hospital of this size should do.

Many of our Visiting Staff, who have served in Base and Field Hospitals in the war centre will most likely return with numerous improved methods involving new and up-to-date requirements. This is, in our opinion, of essential importance to the life of the patient or to the reconstruction of disabled cases whereby the institution renders the best service to its patrons as did the National Government to its soldiers.

We are pleased to note many improvements have been made during the year just closed, and while the amount appropriated for such was only \$5,000.00 during the first year, a subsequent appropriation available about March, 1919 will bring the total to \$20,000.00. Of this we have spent on the Heating System and new Boiler Instruments, approximately \$15,000.00.

There was loaned to General Fund account during the year, a total of \$32,000.00 and \$15,000.00 of this amount was included in the appropriation of \$60,000.00 to be refunded by the State. \$8,139.89 was paid back, leaving \$8,860.11 which your committee hopes to refund during the coming year.

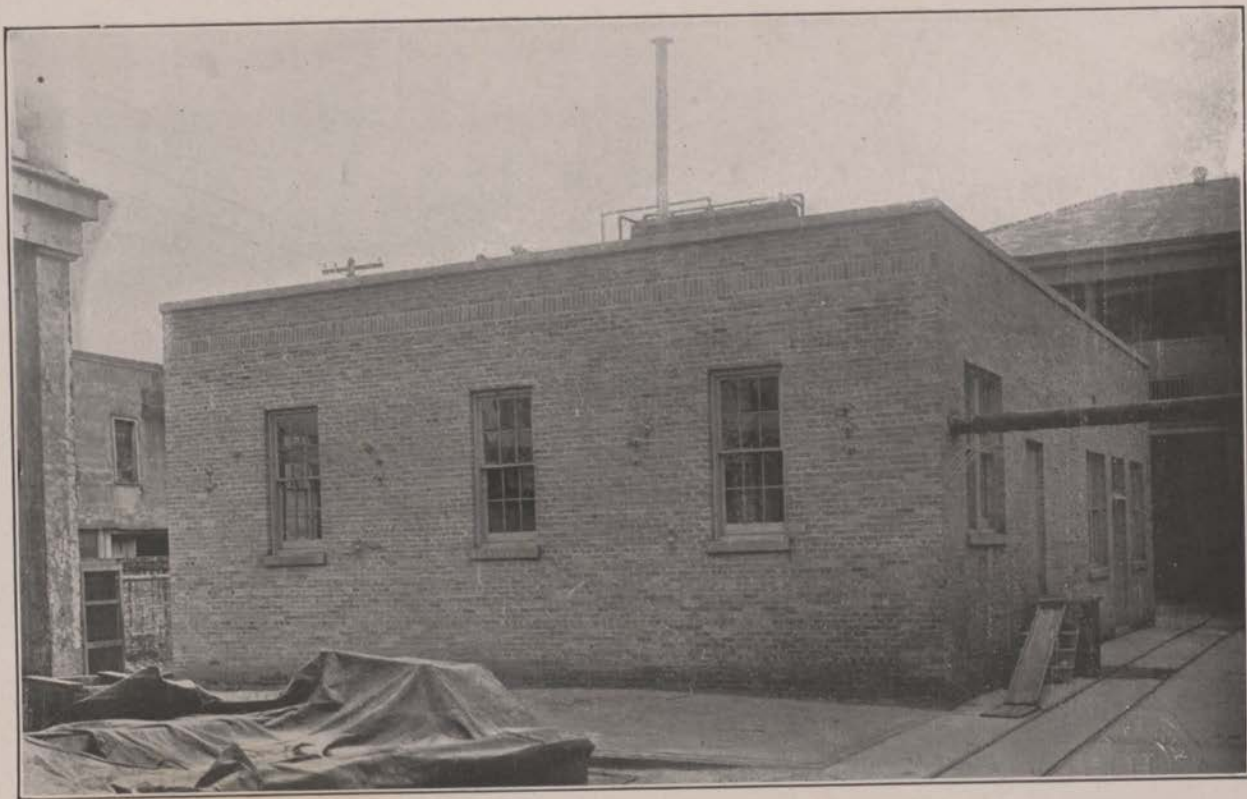

Respectfully,

WILLIAM PFAFF, Chairman,

ALBERT J. LAPLACE.

LEON PFEIFER.

EXTERIOR ICE PLANT AND BAKERY

# Superintendent's Report

To the Board of Administrators, Charity Hospital, New Orleans, La.

Gentlemen:—Herewith I submit to you my report for 1918:

## BED CAPACITY OF HOSPITAL

Training School for Nurses—	49	16
Graduates.....	21	24

By an examination of the figures above presented, it is noticed that the number of patients at the beginning of this year was very much lower than in 1917; while the admissions did not seem to be so many in proportion, still those remaining were about two hundred less.

The daily average was much lower during this year, due, I presume, to conditions of the war and other conditions such as higher wages, etc., making people more independent and more able to pay for their attention.

The outdoor clinic was still falling short for the same reason as quoted above.

The accident cases were quite a few less, by over twenty-six hundred.

The per capita cost was \$1.12. This, I consider a tremendous saving, particularly when we remember that we have enough gauze and other material to last six months in this year, easily, and the cost of which is included in this \$1.12.

The death rate this year is quite large due to the fact that we had two very severe epidemics of influenza and the hospital was closed to all other patients except emergency and accident cases for several months at a time.

The operations were much less in both the Miles and Delgado operating rooms for the same reason.

In the pharmacy department we find we filled nearly thirty thousand more prescriptions than the previous year, showing the increasing popularity of this department.

### IMPROVEMENTS

In checking up the work done by the different experts appointed by the government, it was decided that we were using more coal than was absolutely necessary,

INTERIOR BAKERY

and to economize as much as possible it was necessary for us to put in the following:

- Provision for weighing and keeping daily records;
- Weighing and keeping waste as low as possible in the feed water used, and keeping of daily records;
- Provision for admitting the right amount of air to the boiler and instruments for recording the draft;
- Cleaning of the tubes and other heating surfaces of the boiler;
- Brickwork repairs to eliminate leaks;

All steam pipes and surfaces of boiler properly covered;  
all of which cost a good deal of money, but I believe it will save considerably more than it cost.

We installed at the same time, an Ice Plant and a Bakery. The Ice Plant making twenty-five tons of ice daily and the Bakery for making all the bread, pies and cakes that this institution will be able to use for many years to come.

This at a cost of about twenty-three thousand dollars.

In addition to the Ice Plant, we installed a Refrigerating Plant, thereby doubling the capacity and enabling us to purchase larger quantities of food each month at quite a saving.

We have also installed a soap tank in the laundry where a solution is made for scrubbing floors, etc., thereby saving over 60% in use of scrubbing powder.

We remodeled and converted the old high pressure heating system to a modern low pressure vacuum system throughout all the buildings, we also rerouted the steam and return mains through new pipe trench, extending along paved walk from the P. D. to the Milliken building. This cost about twenty thousand dollars.

We renovated the ambulance house, and have moved the internes from the old clinic building to the ambulance building and have moved the clinic from the polyclinic to the building formerly occupied by the internes. I believe this is a good move because it keeps us on our own ground and keeps things where we can properly look after them.

We found that the large cement chimney was leaning and it was necessary to put up some wires to bring it back in line. This has been done with good results.

We removed the old toilets, lavatories and sinks in the white female building and put in cement flooring and new fixtures and made these toilets up-to-date. We also equipped with bath rooms and toilets the nurses' infirmary on both second and third floors.

During the last year quite a good deal of painting was done. We painted entirely, the sisters' building and the nurses' home, the Delgado building was painted nearly the entire Milliken building and a good portion of the main building. The ambulance house, of course, was painted throughout.

Number 227 Villere Street, the double two-story building owned by the hospital, which was formerly occupied by ambulance drivers, is now rented to employees of this institution for about \$36.00 per month, but it was necessary before this building could be occupied by the present occupants to renovate it to some extent. This was done and has given entire satisfaction so far.

#### IMPROVEMENTS HOPED TO BE MADE THIS YEAR

We expect to put in an electric light plant, thereby generating our own electricity, a new storehouse, a new up-to-date morgue and three new ambulances.

In closing, I wish to thank the Board of Administrators, particularly our President and Chairman of the House Committee, for their active aid in the construction work done this year.

I also wish to thank Sister Stanislaus and her noble band of Sisters for their assistance and co-operation. To Doctors Landry and Leidenheimer, our present House Surgeons, we owe quite a debt of gratitude as well as to the visiting and interne staffs.

Yours respectfully,

S. W. STAFFORD, M. D.,  
Superintendent.

# Report of the Treasurer

NEW ORLEANS, December 31st, 1918.

To the Board of Administrators, Charity Hospital, New Orleans, La.  
Gentlemen:—I respectfully submit below summary of receipts and disbursements, and on the pages following, comparative statement.

Young Ladies of St. Charles Ave. Christian Church	Quantity of Toys for Christmas Tree.

INTERIOR ICE PLANT

# Pathological Department

NEW ORLEANS, February 4th, 1919.

Dr. S. W. Stafford, Superintendent, Charity Hospital, City.

Sir:—I beg to submit the following annual report of the Pathological Department of the Charity Hospital for the year 1918. The routine work in the different divisions of the Department is below that of the preceding year, owing to the small staff and budget allowed for the year just ended. In justice to the Department, it should be appreciated that the great fall off in the work could not be helped since we have been obliged to run the five subdivisions with a greatly depleted staff and inadequate help owing to the exigencies of the war. We have, however, been able to keep up to standard the antitoxin and Pasteur divisions. Not only have we manufactured the necessary amount of Diphtheria and Tetanus antitoxin for the Hospital, but have had considerable quantities of these products in excess, which has been sold in the State. The proceeds of such sales have more than defrayed the yearly expense of the manufacture of the antitoxins. This extra source of revenue, together with what the Laboratory has saved the Hospital by not having to purchase this sera from commercial houses, makes the department of no expense whatsoever to the Institution. Expressed otherwise, the manufacture of antitoxin is a saving of expenditure of more than the yearly budget of \$8,000.00 heretofore granted to the Department.

The Department is gratified to know that the Board of Administrators has accepted the plan submitted by the Director of the Department for the ensuing year, which will certainly bring the Department to a higher state of efficiency such as was the case prior to the war. By said plan, our personnel will consist of the same number of workers as enjoyed three years ago, namely, a Director, First Assistant, Second Assistant, Senior and Junior Pathological House Internes, Technician, Assistant Technician, Stenographer and three porters. With this staff and the budget, allowed under the new plan, of \$12,000.00, the work in the Department should be materially improved for the year 1919.

The staff of officers, as arranged for the present year is as follows: Pathologist and Director of the Department, C. W. Duval, M. D.; First Assistant Pathologist, G. B. Adams, M. D.; Second Assistant Pathologist, R. H. Potts, M. D.; Senior Pathological House Internes, R. B. Ehlinger; Junior Pathological House Internes, J. A. Beals.

A comparative statement of the work carried on in the Department during the years 1917 and 1918 is herewith submitted:

## DIVISION OF CLINICAL MICROSCOPY

	1917	1918
Differentials and Total Counts.....	1501	2522
Sputums.....	798	1411
Feces.....	236	316

Mississippi	4	7
Texas		4

CHAS. W. DUVAL, M. D.,  
Director of the Department.

# Roentgen Ray Department

NEW ORLEANS, February 24, 1919.

Dr. S. W. Stafford, Superintendent, Charity Hospital, New Orleans.

Dear Sir:—I beg to present the following report of my department:

It is a noteworthy fact that war conditions caused somewhat of a decrease in the number of patients examined, also a slight increase in the cost of materials used, as compared with the previous year. However, the sum of \$514.00 collected from compensation insurance cases more than offset the increase, as is shown by the Secretary-Treasurer's report.

More modern and new accessories to do better radiographic, fluoroscopic and treatment work are under consideration. With the purchase of such equipment the department will be equal to that of any up-to-date hospital.

In closing, I desire to extend many thanks to Dr. Amedee Granger who so ably and conscientiously took care of the work during my absence in the service of the Medical Corps, U. S. A.

The following is a comparative tabulated record of the past two years' work:

	1917	1918
Number of Total Exposures Made.....	4940	4215
Number of Total Plates Made.....	4374	3597
Number of Total Patients Examined.....	3866	3177
Number of Parts Examined:		
Skull and Bones of Face.....	327	265
Thorax.....	446	260
Upper Extremities.....	1074	998
Lower Extremities.....	1041	1030
Spinal Column.....	234	146
Gastro-Intestinal Tract.....	341	248
Genito-Urinary Tract.....	247	125
Abdomen and Pelvis.....	98	69
Cases Treated by X-Rays.....	617	567
Photographs of Patients.....	164	74
Fluoroscopic Examinations.....	182	85

Respectfully submitted,

JAS. B. HARNEY, M. D.,  
Roentgenologist.

## Report of Dental Clinic

NEW ORLEANS, February 21st, 1919.

Dr. S. W. Stafford, Superintendent, Charity Hospital, City.

Dear Sir:—The following is my report of the Dental Clinic for 1918. We did not accomplish quite as much work in the clinic this past year as we did formerly for the reason that the clinic was closed for some time on account of the Influenza.

Patients Treated.....	650
Teeth Extracted.....	697
Conductive Anaesthesia Administered.....	690

### RESULTS OF THE TREATMENT IN THE HAY FEVER CLINIC CHARITY HOSPITAL

---

In a series of 312 cases treated by pollen extracts, bacterial vaccines, or a combination of these, the following results were obtained:

Seasonal Cures, 45%; Marked Improvement, 42%; Unimproved or the Treatment Discontinued, 13%. In the cured and improved cases, pollen extracts alone were used in 41%, pollen extracts and bacterial vaccines in 54%, and vaccines only in 5%.

While the average results in these cases are satisfactory, we believe that the number of seasonal cures will be considerably larger when the advantages of the preventive treatment of Hay Fever are better understood. In the majority of cases in this series, the treatment was not begun until the Hay Fever had actually developed when the effects of pollen therapy are not as effective as its preventive treatment.

W. SCHEPPEGRELL, M. D.

N. F. THIBERGE, M. D.

# Report of the Directress of Nurses

NEW ORLEANS, February 4th, 1919.

To the Honorable Board of Administrators, Charity Hospital, New Orleans, La.

In presenting this report of the Training School for the year 1918, we are confronted with the fact that our nursing force has been a prey to misfortune for many months, and without doubt 1918 will mark a new era in the history of nursing, as it is believed the recent epidemic, though disastrous in itself, will be of inestimable value in the stimulating of more effective and orderly nursing. Our Nurses made every effort to co-operate with the Doctors to combat the disease in the hospital, and deserve congratulation and gratitude for their heroic devotion to duty.

Before the Influenza became a real menace, our nursing corps numbered one hundred and ten (110), including Sisters, graduate and pupil nurses, but during the epidemic our staff was reduced to about one-third of its number, for as soon as the epidemic reached the Nurses' Home our students became fast victims, and at the time it was impossible to secure new candidates. However, out of the seventy-four cases of Influenza among our nurses, only one developed pneumonia; the others recovered with apparently no complications.

While the above conditions lasted, we were forced to suspend all classes, lectures, and surgical training, and did not resume our regular work for over two months.

Apart from the above-mentioned attack, the general health has been remarkably good.

It is with deep regret that we report the death of one of our senior nurses, who fell a victim to the influenza.

Order, as we all recognize, is very essential in an institution of this kind, consequently the failure on the part of pupils to apply this as a guiding principle has been the cause of the majority of our dismissals. We are glad to state that the previous discipline of the school has been in full vigor, and the attitude of pupils toward authority seems very good.

We have introduced an excellent course in anaesthesia, which is being offered with satisfactory results under an efficient instructor.

The Nurses' Infirmary has been renovated; the painting renewed throughout the Nurses' Home, and the heating system improved. We anticipate in the near future the installation of a complete system of electric lighting.

As the spirit of co-operation and enthusiasm brings to the hospital the best class of probationers, we have every reason to hope for an increase in our number of pupils. In loyalty there is strength, and if we receive, as in the past, the co-operation and assistance of the Administration, we hope for even a still higher standard of professional attainments.

In conclusion, we wish to state that an incalculable debt of gratitude is due to Doctor Stafford for his splendid support in our behalf, also to Doctors Landry and Leidenheimer for their devoted attention to our nurses during their illness. To the Lecturing and Visiting Staffs, we express our sincere thanks for their kindly interest in our school during this period of anxiety and trial.

Number of Applications Received.....	314
Number of Applications Rejected.....	260
Number of Applications Accepted.....	54
Number of Nurses Dismissed.....	6
Number of Nurses Resigned.....	25
Total Number of Pupil Nurses in Training School.....	88
Total Number of Nursing Sisters.....	28
Total Number of Graduates Employed.....	14

Respectfully submitted,

SISTER STANISLAUS.

# Report of the Social Service Department

NEW ORLEANS, January 1-December 31, 1918

Our work during the past year has been principally confined to selected wards where new cases are interviewed, social problems learned, and those cases in need of it followed into homes after discharge from hospital. Medical Clinic, where unclassified cases are steered into different clinics, such as the Genito-Urinary, Gynecological, Throat, Eye, and Dental; Obstetrical Clinic, where periodical examinations are made, prenatal instructions given, patient supervised in home till time for confinement, and child referred to C. W. A.; Pediatric Clinic, where cases of tuberculosis, malnutrition, and congenital-syphilis in children are given our close supervision; Neurological Clinic, where the feeble-minded, epileptic and nervous patients are supervised, and cases referred to us from various departments of the hospital for permanent homes, convalescent care, orthopedic appliances, crutches, eye glasses, clothing, financial aid, employment, and railroad transportation.

Cases brought from previous years	89
Total number of new cases	457
Total number cases dealt with	594
Total number reinstated cases	48
Total number closed cases	392
Total number visits to homes	1487
Total number visits to wards	1026
Total number visits to clinics	656
Total number office conferences	1930
Total number letters written	253
Total number letters received	186
Total number postals written	250
Total number postals received	67
Total number patients referred to C. W. A.	57
Total number patients referred to A. T. L.	12
Total number families referred to C. O. S.	6

# SUMMARY OF OBSTETRICAL CASES IN 1918, AS PER HISTORIES FILED IN RECORD ROOM

There were 614 Maternity cases delivered in the Hospital.

White .....	227	Frimiparae .....	293
Colored .....	387	Multiparae .....	321
Presentations—		Positions—	
Vertex.....		Left Occipito-anterior.....	343
		Right Occipito-anterior.....	146
		Left Occipito-posterior.....	2
		Right Occipito-posterior.....	5
Breech.....			
Transverse.....	28		
Face.....	4		
Foot.....	6		
Shoulder.....	2		
Hand.....	1		
Not Reported.....	4		
			73
			614

## MANNER OF DELIVERY

Naturally .....	567
By Forceps .....	22
By Fodalic Version (Some with Forceps) .....	14
By Caesarian Section (Deaths—5 Mothers, 3 Infants).....	11
	614

There were twelve cases of twin parturition.

There was one case of triplets.

## MORTALITY OF MOTHERS

There were twenty-one deaths among the Mothers, or 3 per cent.

From Eclampsia (admitted in that condition).....	8
Shock.....	3
Influenza.....	9

## In Memoriam

---

NATHAN S. STERN

---

WHEREAS, the never-wearying reaper, gleaming as he passes by, has stopped on his journey and gathered in one of our most valued members, and

WHEREAS, we shall sadly miss his presence and his valuable services at this Board, and

WHEREAS, our companion has gone from among us without warning, and it is difficult for us to realize that our earthly connection has been severed and he has passed out of our lives forever, and

WHEREAS, as a man and a citizen he was held in high esteem, honest himself, he was loath to believe anything dishonest in another, kind and considerate toward all who came in contact with him, a true friend and wise counselor, ever ready to extend the helping hand to the needy and unfortunate, gentle and kind in his disposition, cheerful and bright in temperament, therefore

BE IT RESOLVED, that we, his fellow-members and friends express our deep sorrow in his death, and our sincere sympathy with his family in their bereavement, and

BE IT FURTHER RESOLVED, that a copy of these resolutions be sent to the family of the deceased, and that it be spread upon the records of this Board.

"There is a reaper whose name is Death,  
And with his sickle keen  
He reaps the bearded grain at a breath  
And the flowers that grow between."

---

## In Memoriam

---

JOSEPH P. WALKER

---

WHEREAS, Mr. Joseph P. Walker, late Chemist and Druggist at Charity Hospital, succumbed to the ravages of the disease during the recent epidemic of Influenza, and passed to the Great Beyond on October 12th, 1918, therefore

BE IT RESOLVED, that the Board of Administrators bear willing testimony to his many virtues and his conscientious attention to his duties during a period of many years employment in this institution, and

BE IT FURTHER RESOLVED, that the foregoing be spread upon the minutes, and a copy sent to his family.
